

A B S T R A C T

A composite structure such as a patch, a disk, or a
towelette for use in particular in treating, making up,
5 or cleaning the skin or the hair. The structure
comprises at least one adhesive matrix based on a
permanent adhesive and present between two support
layers, at least one of which is permeable to a solvent,
the two support layers being permanently bonded to the
10 adhesive matrix, the adhesive matrix containing at least
one active agent soluble in said solvent and possibly a
filler, the nature and the quantity of the active
agent(s) and/or the filler being selected to make it
possible, when the composite structure is wetted by the
15 solvent, for the active agent(s) to be released and to
diffuse towards the surface to be treated.
